

Field Notes: NSA Exclusion - CrowdStrike Sinkhole

Problem statement 1: What is cloudsink.net? This is a CrowdStrike owned domain for their sink hole function. If you're seeing traffic to cloudsink.net in logs or alerts, it means CrowdStrike has successfully intercepted and redirected malicious activity. We can exclude this domain from dns and download and detections.

Analytics Rules > Rule Exclusions

Exclusion name: `CrowdStrike Sinkhole`

Exclusion description: `If you're seeing traffic to cloudsink.net in logs or alerts, it likely means CrowdStrike has successfully intercepted and redirected malicious activity.`

Condition: `contains('dest_host', 'cloudsink.net')`

Specify Rule Families as seen in screenshot.

Edit/View Exclusion

Exclusion Name

CrowdStrike Sinkhole

Description (optional)

If you're seeing traffic to cloudsink.net in logs or alerts, it likely means CrowdStrike has successfully intercepted

Condition what to look for

Condition

contains('dest_host', 'cloudsink.net')

Use any User entity Attribute or CIM fields to define your condition Check [Documentations](#) for syntax.

Scope Exclude from all analytics rules, or choose a rule or rule family to exclude when the condition is met.

☐ All ☐ Specify rules ☒ Specific rule families

All rules associated with the selected family will be excluded, including any future additions to that family
