

Field Notes: NSA Exclusion - ISP Country Exclusion

Problem statement 1: Rules fire on events that are coming from Microsoft and Zscaler. The goal of Country detection rules are to trigger on the Users actual source country. We can exclude by ISP name.

Suggested Action: Exabeam PS recommends excluding 'microsoft corporation' and 'zscaler' in this rule activity. This will prevent the most common of the Multiple Country False Positives.

Analytics Rules > Rule Exclusions

Exclusion name: `ISP Country Exclusion`

Exclusion description: `Country expected for User ISP and not for Microsoft and/or Zscaler`

✓ Option 1 (Working)

Condition: `containsAny(geo_src_ip, "microsoft corporation", "zscaler")`

Specify Rules as seen in screenshot.

Exclusion Name

Description (optional)

Condition what to look for

Condition

 Use any User entity Attribute or CIM fields to define your condition Check [Documentations](#) for syntax.

Scope Exclude from all analytics rules, or choose a rule or rule family to exclude when the condition is met.

Verification / Troubleshooting

Use this search:

```
rule_id: "Prof-GA-Country-U-SCountry" AND geo_src_ip.isp:
("microsoft corporation","zscaler")
```

✖ During initial testing we found this condition not working. DO NOT USE.

Condition: `containsAny(geo_src_ip.isp,"microsoft corporation","zscaler")`
